PROFESSIONAL SUMMARY

Software Engineer with 1.5+ year of experience developing enterprise applications using .NET Core, Angular, microservices, and RabbitMQ at Société Générale. Experienced in REST APIs, structured logging with Serilog, Kubernetes-based service monitoring, and document-processing workflows involving OCR, classification, and NER.

PROFESSIONAL EXPERIENCE

Société Générale | Software Engineer 09/2025 – Present

- Developed and maintained ASP.NET Core Web API and Angular modules for an internal KYC platform, supporting compliance and identity verification workflows.
- Integrated RabbitMQ-based asynchronous communication across 2 microservices to trigger stages of document processing after the submission.
- Implemented centralized structured logging using Serilog across 10+ services to improve error diagnosis and traceability across services.
- Maintained document-processing components involving OCR, Document Classification, and Named Entity Recognition (NER) for automated identity verification.
- Designed custom health-check endpoints and developed an operational monitoring dashboard, cutting deployment verification and troubleshooting time across Kubernetes clusters.

Société Générale | Software Engineering Intern 03/2025 – 09/2025

- Developed responsive frontend modules using Angular, React, JavaScript, and TypeScript for enterprise banking applications.
- Built reusable UI components and integrated RESTful endpoints, accelerating feature delivery cycles across frontend.
- Tested frontend functionality, resolved UI defects, and improved responsive behavior across devices while collaborating in Git-based Agile workflows.

TECHNICAL SKILLS

- **Languages:** C#, Java, Python, TypeScript, JavaScript, SQL
- **Backend:** ASP.NET Core, Microservices, REST APIs, Serilog, RabbitMQ, PostgreSQL
- **Frontend:** Angular, React, HTML5, CSS3, Bootstrap
- **Cloud/ DevOps:** Kubernetes, Docker, Git, CI/CD pipelines, Swagger
- **Libraries and Concepts:** OpenCV, OCR, Named Entity Recognition (NER), Event-Driven Architecture
- **Coding Profiles:** LeetCode - 243+ problems solved (Easy: 119, Medium: 105, Hard: 19)

KEY PROJECTS

SRGP Institutional Web Platform 12/2025 – present

- Engineered and deployed a production institutional web application for SRGP Pharmacy College from scratch using React, TypeScript, and Vite, structuring 20+ dynamic client-side routes via React Router.
- Developed reusable responsive components, interactive navigation, galleries, carousels, and admission/enquiry forms for desktop and mobile users.
- Integrated Formspree via asynchronous HTTP requests for enquiry submissions, implementing client-side validation, loading states, success/error handling, and configured SPA rewrites for deployment.

BP Monitoring Dashboard 02/2026 – 03/2026

- Developed a responsive BP tracking application using React and TypeScript, enabling users to record readings with timestamped history.
- Implemented client-side state management and persistent storage using React Hooks and browser local storage, with reading-status indicators and deletion functionality.

EDUCATION

Vellore Institute of Technology (VIT) | B.Tech in Computer Science & Engineering CGPA: 9.09 07/2021 – 10/2025

Scholarships: Recipient of GVSDP Academic Merit Scholarship (50% tuition waiver)

St. Anthony's School, Barabanki | Class XII (PCM) Percentage: 95.8% 04/2020 – 07/2021

Scholarships: Recipient of Academic Scholarship (100% tuition waiver)
